What separates good landscaping from extraordinary outdoor spaces?

It's a certain flair or an expression of panache that captivates the viewer. In addition to designing and building gorgeous landscape and hardscape features, Broccolo Tree & Lawn Care specializes in creating engaging artistic features that can make you feel as if you're living large even if your outdoor space is quite tiny.

"We can make any artistic display to fit your aesthetic," says Laurie Broccolo, owner of Broccolo Tree & Lawn Care.

Some examples include:

FIRE & WATER DISPLAYS

Combining the mesmerizing nature of fire and water, Broccolo's displays appear magical. In one, water spills through the vents of an antique, cast-iron stove, while a fire glows from within, radiating heat and creating gentle steam. A sleeker, modern version has the water falling over a blue stone top, like a reflecting pool, spilling over the sides. This also has an internal fire.

LIVING WALLS

Whether your vertical garden space is on a trellis in the ground or a wall embedded in a patio, Broccolo will bring it to life as a kitchen garden, cascade of vines, or artistic sweep of sedums.

CONTAINER GARDENING

Broccolo will select and arrange containers on a deck or patio to create a container garden that is luscious, vibrant, and aesthetically pleasing.

FAIRY GARDENS

Growing in popularity, fairy gardens are a place of fantasy and whimsy. To achieve the delicate, lived-in look on a miniature scale, Broccolo selects a combination of dwarf specimens and ground cover appropriate for the micro-environment.

"These displays are custom-made by local artists who are part of our team," says Broccolo. Immerse yourself in the experience that Broccolo can bring to your house at Broccolo Garden Center, which is quickly becoming a popular destination point unto itself.
